

INTERVENTION FACT SHEET

Regional Organization Development Network

1. General Information

RODNET member name	Marva Thompson (assisted by Ingrid Jansen)
NS/OSB counterpart name	Doreen James
NS/OSB counterpart function	President
Country assisted	Anguilla
Intervention period	2 weeks
Estimated budget (USD)	\$508.00

2. Background

RODNET approached

This Project came about when Marva Thompson learnt from Ingrid Jansen of the upcoming workshop in St.Maarten and thought that it could benefit the youth in Anguilla. The President had indicated her desire to get some training for the Youth of Anguilla in HIV/AIDS and decided to proceed with this project . Marva was asked to coordinate it .

Conditions before the intervention

Prior to the intervention no involvement of the Youth in the Red Cross TWC programme. Also no Junior Red Cross existed in Anguilla.

3. Intervention details

Characteristics of a Well functioning National Society

This intervention will help to strengthen the awareness of the Red Cross in the community with regard to its role in assisting vulnerable persons in the community. This relates to Performance and relevance of the activities carried out by The Red Cross.

OD intervention areas

This would be part of the Heath & Community work in an effort to strengthen the awareness of the young people in relation to HIV/Aid education.

Methodology

The intervention was more on the lines of facilitating the external body i.e GOA Youth and Culture department to arrange the workshop and to liase between the St.Maarten Red Cross and the Dept.

Expected results

The results from this intervention would be increased awareness among the youth of Anguilla by the spearheading of a TWC programme by the four young people in peering education of HIV/AIDS and possible the formation of a Junior Red Cross.

4. Financing

Budget:

Hotel Rooms	240.00
Boat Trip & Taxes	108.00
Per diem for Food	160.00
Total	\$508.00

Funding plan

Budget to be covered by funds received from British Red Cross to HIV/AIDS education.

5. Others

Annexes

Copy of report on the Workshop attached for information.

Miscellaneous

In Anguilla assisting in education of HIV/Aid is very difficult because of the small community persons are reluctant to inform of their illness as result statistics on the number of infected persons do not in any way reflect the actual situation. Persons go to nearby islands for treatment rather than obtain treatment locally. There are only 3 known cases who presently being treated in Anguilla at this time.
